CLAREMONT, N. H.

FOR THE

Year ending February 15th, 1907.

The National Eagle Printery, Claremont, N. H.

Town Warrant.

STATE OF NEW HAMPSHIRE.

L.S.

To the Inhabitants of the Town of Claremont in the County of Sullivan, in said State, qualified to vote in town affairs:

YOU are hereby notified to meet at the lower assembly room in the Town Hall in said town, on Tuesday, the twelfth day of March next, at eight o'clock in the forenoon, to act upon the following subjects:

1. To choose all necessary town officers for the ensuing year.

2. To see what action the town will take upon the following question: Shall the second class license fee for sale of liquor be raised to twelve hundred dollars? To see in what manner the vote shall be taken upon said question.

3. To see what action, if any, the town will take in regard to fixing the fees for licenses to be granted under the license law for the sale of liquor.

4. To see what sum of money the town will vote to raise to pay town officers for the fiscal year ending February 15, 1908.

5. To see what sum of money the town will vote to raise to pay incidental expenses for the fiscal year ending February 15, 1908.

6. To see what sum of money the town will vote to raise for the support of schools for the fiscal year ending February 15, 1908.

7. To see what sum of money the town will vote to raise for the repair of highways and bridges for the fiscal year ending February 15, 1908, and determine how it shall be paid.

8. To see what sum of money the town will vote to raise to pay the debts of the town.

9. To see what sum of money the town will vote to raise for the support of the town's poor for the fiscal year ending February 15, 1908.

10. To see what sum of money the town will vote to raise for the support of the Fire Department for the fiscal year ending February 15, 1908.

11. To see what sum of money the town will vote to raise to pay for the use of hydrants for the fiscal year ending February 15, 1908.

12. To see what sum of money the town will vote to raise and appropriate for street lights for the fiscal year ending February 15, 1908.

13. To see what sum of money the town will vote to raise for the expense of Memorial Day.

14. To see what sum of money the town will vote to raise for the benefit of the American Band.

15. To see what sum of money the town will vote to raise to pay the Board of Education for the fiscal year ending February 15, 1908.

16. To see what sum of money the town will vote to raise in aid of the Cottage Hospital.

17. To choose a committee for Stevens High School for the ensuing year.

18. To determine the rate of discount the town will allow persons paying their taxes within such period as the town may designate.

19. To see what action the town will take in regard to having two regular policemen, one for day and one for night work.

20. To choose three members of the Board of Trustees of Fiske Free Library, to serve for the term of three years.

21. To see if the town will vote to raise the sum of fifteen hundred dollars ($1,500 00) for the support of Fiske Free Library, to be applied agreeably to the contract with Andrew Carnegie and Samuel P. Fiske.

22. To see if the town will vote to raise the sum of twenty-four hundred seventy-two dollars ($2472 00) to apply on payment of notes given to raise money for building North Street School House.

23. To see if the town will vote to instruct the Selectmen to appoint a board of three Commissioners who shall have full charge of the cemeteries in town; sell burial lots and make conveyances of the same, collect the pay, and use the money for the improvements of said cemeteries, and also authorize said commissioners to use the money now on hand which has been raised from the sale of lots, and also raise and appropriate an additional sum of money for the improvement of said cemeteries.

24. To see if the town will vote the Fire Department the free use of the town hall one such night as they may desire to hold their annual Firemen's ball, when the hall is not previously engaged.

25. To see if the town will vote to put in a dry hydrant pipe from Tremont Square to upper bridge, with hydrant at Square and connection at bridge for steamer, and raise and appropriate a sum not to exceed nine hundred dollars ($900 00) for said purpose.

26. To see if the town will vote to place a hydrant at or near the junction of Main and Ascutney Streets, and raise and appropriate money therefor.

27. To see if the town will vote to place a hydrant near the house of A. H. Allen on Maple Avenue, and raise and appropriate money therefor.

28. To see if the town will vote to place a street light on Ascutney Street.

29. To see what sum the town will raise for the erecting of new street lights in such places as they are needed about the town.

30. To see what action the town will take regarding the lighting of Hanover Street between North Street and the Cottage Hospital.

31. To see if the town will vote to repair Pleasant Street, determine in what manner the work shall be done, and raise and appropriate money therefor.

32. To see if the town will vote to raise the salary of the tax collector from five hundred dollars to eight hundred dollars.

33. To see if the town will vote to exempt from taxation for a term of five years the property of the Sullivan County Fair Association.

34. To see if the town will vote to unite with the contiguous town of Weathersfield, in the State of Vermont, for the building of a free bridge over the Connecticut River agreeably to the provisions of sections 12 and 13, chapter 67 of the Public Statutes, and

To see if the town will vote to authorize its Selectmen to unite with the Selectmen or other proper officers of said Weathersfield, and contract with them for the purchase of any real estate or franchise if in their opinion the public good requires a highway to be laid out over such property or so near thereto as seriously to affect the value thereof, and to agree as to the proportion of expense to be borne by each town in the construction and maintenance of such highway, including piers, abutments and approaches and the proportion that each shall pay to third persons as damages subject to the approval of the town agreeably to the statute in such case made and provided.

35. To see what sum of money the town will vote to raise and appropriate for the purposes mentioned in the last preceding article or to see in what other way the town will vote to provide therefor and to take any action necessary to carry out the purposes of this article by borrowing money and giving notes or issuing bonds of the town therefor.

36. To see if the town will vote to give the free use of the town hall at three different times during the year and of the opera house once during the year, when not otherwise in use, to the Ladies' Union Aid Society for the benefit of the Claremont Cottage Hospital.

37. To see if the town will vote to choose assessors.

38. To see if the town will vote to instruct the Selectmen and board of assessors to make a complete re-valuation of the taxable property of the town, and raise and appropriate money therefor.

39. To see if the town will vote to purchase a steam road roller, and raise and appropriate money therefor.

40. To see if the town will vote to make changes in the Library Block so that the upper floor can be rented, and raise and appropriate money therefor.

41. To transact any other business that may legally come before said meeting.

Given under our hands and seal this twenty-fifth day of February, Nineteen Hundred and Seven.

GEORGE W. PAUL,
W. T. FREEMAN,
CHAS. F. FLETCHER,
} SELECTMEN OF CLAREMONT.

A true copy of warrant, attest :

GEORGE W. PAUL,

1900,	65,136 68

Permanent Improvement of Main Highways.

Under the law of 1905 and the votes of the town at the annual meetings in 1905 and 1906, a joint fund of $6,344.90 was made available for the above named purpose, as is shown in the tabulated statement, which follows the itemized account of expenditures. The State Engineer, after several visits to the town and examination of available material, revised the plan made in 1905, and on July 14 advertised for bids for constructing the road. The selectmen deeming it for the best interests of the town to do so, submitted a bid for the work, and being the lowest bidder, the town was awarded the contract, which was executed by the Governor and the Board of Selectmen on July 31, 1906. The work was commenced at the southerly line of the Street Railway on the main road to Charlestown on August 13, and completed November 10, at a point 5300 feet, or 1 mile and 20 feet south-westerly therefrom.

The work was done under the superintendence of Mr. E. C. Lewis, the Highway Agent of the town. The road was well graded, straightened, and about 2400 feet of under-drain was constructed, carrying tile pipe of from 8 inches to 18 inches in diameter, with 13 brick catch basins to take both the ground and surface water. Where under-ground drain was not constructed, deep surface ditches were made. The road was built 21 feet in width—15 feet of gravel surface, with shoulders of three feet on each side. On the Ainsworth Flat, 900 feet of heavy Telford base was built. Twenty-seven hundred sixty-four yards of gravel were used, the same being put on in three layers, each of which was thoroughly rolled. The work was approved and the road accepted by the State Engineer. The total cost of the work, including expense incurred in 1905, was $6,435.01. The attention of the public is invited to the following itemized account of expenditures, also to the letter of State Engineer Dean under date of Jan. 5, 1907.

1905

Paid Frank W. Brown for survey and plans,					$ 15 00

*State disbursements indicated above are payments made by the State from the joint fund for surveys, plans, inspection or advertising.

CONCORD, N. H., January 5, 1907.

GEO. W. PAUL,
Chairman Board of Selectmen,
Claremont, N. H.

Dear Sir:—

I have compared the cost of the work done by the town under the state aid law with what would be the cost if the contract had been let to the contractor who made the lowest bid last summer, and find that the town saved in money about $375 00 besides doing some work additional to what the contractor would have done under his contract. The facts that you have saved the above sum for the town, have done more work than the contractor would have done, and have kept the money at home, are, I think, good arguments in favor of the towns taking the contracts wherever they are properly equipped and have good superintendents to do the work.

Yours very truly,
A. W. DEAN,
State Engineer.

		(Balance over appropriation).	
	11	Lower hall, basement, check room and checks, Ball, United Society,	20 50
	13	Cash from old iron and bottles,	3 15
	15	" " check room when not rented,	13 15
			$ 2,730 30
The opera house has been used four times and the lower hall thirty-three times for which no income has been received, and had the regular rates been charged the earning power of the building would have been increased,			471 50
Placing the value of the two offices to the town at $175 00 each,			350 00
And the basement for the use of the fire department at			250 00
This gives the town building an earning power of			$ 3,801 80

Highway Department.

Edward C. Lewis, Agent.

		$ 390 64

Ten thousand dollars ($10,000 00) of this fund was loaned secured by mortgages on real estate. There has now been collected and paid to the Trustees $8,153 06, leaving a present deficiency of $1,846 94, which should be materially reduced from the sale of western lands belonging to the fund, on which there was originally loaned less what has been paid on them $1,500 00. For particulars of the entire fund see report of Board of Trustees.

REPORT OF THE TRUSTEES OF THE PARAN STEVENS AND HELEN R. HEALEY FUNDS.

The total amount of these Funds now in the hands of the Trustees and invested in the Claremont Water Supply Bonds, for the benefit of Stevens High School, is $153,300 00. Of this sum $85,200 00 is from the Stevens' estate and $68,100 00 from the Healey estate. During the past year the old Healey homestead has been sold for $2,500 00 and one small house lot for $250 00. From the selectmen have been received $385 89 from sales and rents of Western lands belonging to the Stevens Funds. These sums, together with $664 11, from former balances, have added $3,800 00 to the water bonds since our last annual report.

Of the Healey real estate there remains the double wooden house and two vacant lots which we hope to dispose of advantageously, at no distant day. To the present time three houses and fourteen lots have been sold. The market value of the remaining portion is estimated at somewhat rising $2,500 00. Thus it can be seen that the munificent bequest of Mrs. Healey exceeds $70,000 00.

Of the original $10,000 00 Stevens Fund invested by Mr. Farwell in Western lands, we are informed by the selectmen who have charge of the matter, that approximately $8,150 00 all told have been received, and several hundred dollars more may be expected.

As the entire $153,300 00 is invested in the Claremont Water Bonds at 4 per cent. interest per annum, the income for the ensuing year, to meet the current expenses of Stevens High School, will be at least $6,132 00.

The income from these Funds, from Feb. 15, 1906 to Feb. 15, 1907 has been $6,074 02; the sum paid to Stevens High School committee, during the same period is $5,700 00, leaving a balance of $374 02. At the beginning of the fiscal year, Feb. 15, 1906, there was in the treasury $1,954 18 to maintain the school to the close of the school year in June, 1906. These two latter items, $374 02 and $1,954 18 equal

$2,328 20 which is the balance in the treasury at the present time for completing the present school year, which ends in June next.

The following is the account with the Healey tenements :

Received from rents,	$ 183 11
Paid for repairs, services, insurance, water, etc.,	146 61
Balance,	$ 36 50

Rents have been advanced to $216 00 a year. Expenses will be less, and the net income substantially increased.

O. B. WAY, Treasurer,

Paran Stevens and Helen R. Healey Trustees.

REPORT OF COMMISSIONERS ON CEMETERIES.

The Commissioners did not receive their appointment until late in the season, consequently they did not accomplish so much as they otherwise would. After their appointment they employed men who cut the brush and undergrowth in the cemetery at West Claremont, and set up all the stones at the graves in this lot. Very little has been done in this yard for years, and the gravestones were in a very bad condition. Many were entirely down and others partly down. This cemetery has been very much improved in appearance, although more needs to be done. In the Pleasant street cemetery, all the head-stones in any way out of position have been set up, and the appearance of the yard greatly improved.

Between one and two hundred dollars was expended in these two yards, but much more should be expended in cleaning up the graves and grounds and improving the walks.

A substantial fence has been erected at the approach to Mountain View cemetery at an expense of about two hundred and fifty dollars; otherwise but little has been done in or about this cemetery during the year, but it is hoped that something will be done here in the near future, by way of improving the drives and cleaning up the grounds. The grass has been kept cut in the old cemetery back of the library building.

Claremont should give more attention to all of its cemeteries in the future than it has in the past. In all the improvements made during the year, the Commissioners have expended about five hundred dollars, and they recommend an appropriation of five hundred dollars for the year to come. This, with other funds now available, will enable more to be done by way of improvements in the near future.

There has been paid out for improvements at the pumping station and charged up to construction, $3,076 60.

Owing to the low stage of the water in the reservoirs, it was necessary to supply water from the wells. We commenced pumping Sept. 25, and continued until Nov. 18. It was found that the entire capacity of the boiler, with forced draft, was required to supply the demand. Soon after we commenced pumping, a leak developed in the boiler. On examination it was found that there were several cracks in the cast iron frame of the feed door, which also connects the outer and inner shells of the boiler, and thus forms part of the boiler. The question at once came up whether or not it was advisable to run the boiler. If not, that part of the town supplied by the Water Works would practically be without water. After considering the situation and advising with others, we decided that we should have to take the chances and run the boiler, so long as the defects did not materially increase. Fortunately, it continued serviceable as long as required.

The uncertainty in regard to how long we could continue to use the old boiler, also as to how long it would be before there would be water in the reservoirs, made it necessary to at once provide means to insure a supply, which we proceeded to do by installing a one hundred horse power boiler (the old one is fifty horse power). This required the building of an addition to the power house and a chimney. While the chimney is not finished, it is of sufficient height so that the boiler can be used if it should be required; and will, as soon as the weather permits, be finished.

Unless the increased demand for water is greater than is now anticipated, this boiler is of sufficient capacity to furnish all the power that will be required for many years.

GEO. H. BOYNTON, Treasurer.

The number of patrons registered at the library at present time is 1,860. During the past year 22,929 books have been taken out, a gain of 646 over the previous year. The whole number of books in the library Jan. 1, 1907, was 7,726. Of these, 275 were added during 1906. Quite a number of books have been given to the library by friends.

There seems to be a small but steady gain both in the number that are using the reading rooms and in the number of books taken for home reading. The people are slowly awaking to the fact that the books are their own and that they will enjoy them, and it is to be hoped that the present year's records will evidence a still larger appreciation of the library and its advantages by the people.

IRA G. COLBY, Sec.,
Trustees Fiske Free Library.

Board of Health.

The following cases of contagious diseases have been reported to us during the past year: Diphtheria, 8; scarlet fever, 3; typhoid fever, 5; measles, 200; number of deaths from consumption, 9. Of the cases of typhoid fever reported, three were from other towns, and came here for treatment. All the cases of typhoid fever, measles, scarlet fever and diphtheria ended in recovery. No assistance has been required from people while in quarantine.

We have given attention to about 200 complaints.

The want of sewers causes us more trouble than any other matter, and as the town gets larger and older, the troubles from that cause get more and more serious. It is a problem sometimes to tell people what to do with their sewage, and they are apt to feel hurt to have an official of the town tell them they must take care of their own sewage, when they think the town should provide them a way to do so. All the Board of Health can do is to have everyone take care of their own drainage as best they can. We still believe that the town should provide for the removal of garbage and rubbish. These things are important, and we hope the people of the town will give more attention to matters that pertain to the public health.

RUFUS L. HOWE,
GEO. A. ROWELL,
A. L. MARDEN,
} Board of Health.

Police Department.

To the Honorable Board of Selectmen:

I have the honor to submit the annual report as Chief of Police for the year beginning February 15, 1906, and ending February 15, 1907.

The force consists of chief, 1 patrolman and 3 specials. The chief is on duty from 12 m. until 11 p. m., the patrolman from 6 p. m. until 4 a. m.

The total number of arrests were 82, 6 being females. Of those convicted 52 paid fines and costs; 6 were taken to county jail; 19 cases were put on probation; 5 went to Industrial School at Manchester.

J. HOWARD OBER, Chief of Police.

Chief Engineer's Report.

During the year ending February 15, 1907, there were ten bell alarms of fire, as follows:

Feb. 16, 10:45 p. m., box 22, Hurd house, Elm St.
" 20, 2:00 p. m., (False alarm to box 31.)
Aug. 6, 7:40 a. m., box 19, Claremont Paper Co.'s barn, Sullivan St.
Sept. 9, 1:00 a. m., box 22, A. I. Hurd place, Fremont St.
" 13, 8:10 p. m., box 22, Colby house, Spring St.
" 25, 5:45 p. m., box 13, George F. Long buildings. River road below Claremont Junction.
Nov. 24, 7:55 a. m., box 32, Martell wood sheds, Washington St.
Dec. 27, 1:40 a. m., box 33, Rice buildings, W. Claremont.
Jan. 27, 9:00 a. m., box 13, Nolin's bakery, Broad St.
Feb. 13, 10:20 p. m., box 13, Cowles house, "Puckershire."

Still alarms for brush and other fires, 27.

During the year there were no serious brush fires as compared with the preceding year, while the total fire losses, with two exceptions, were comparatively light. The Long buildings on the River road below Claremont Junction, and the Rice buildings at West Claremont, were totally destroyed. At the Long fire, the buildings were far outside the fire limits, and beyond reach of any water. In both cases the firemen responded promptly to the alarm, but as the buildings were practically consumed before the alarm was general, not much remained to be done after the firemen arrived.

In the case of the fire at the Cowles house in "Puckershire," fire headquarters were notified at once by telephone, so that chemical extinguishers were sent, with a sufficient number of men in time to save the house, the fire having originated around a chimney.

The majority of still alarms have been for chimney fires. In every instance prompt assistance has been rendered, often preventing more serious fires. The calls to attend chimney fires, brush fires, and fires in the outskirts of the town are

constantly increasing, and to provide for such cases, and at the same time look out for the protection of village property, an "outside alarm" has been arranged, of "three twos" repeated on the bells and whistle. Upon this signal firemen will report at once at headquarters.

THE ELECTRIC FIRE ALARM SYSTEM.

The closing months of the last fiscal year have been devoted to a general overhauling of the electric fire alarm system, which includes about 15 miles of wire, 29 alarm boxes, numerous private bells at firemen's homes, and an automatic tapper in the town hall bell tower. For some time the alarm had not operated satisfactorily, principally because the electric power to strike the numerous bells had not been increased proportionately with the growth of the service, which every year is being extended, and new bells and boxes added. In connection with other changes and permanent improvements made to the system, it was decided to increase the power, and this has been done. The fire alarm and clock batteries have been separated and between 80 and 90 additional fire alarm batteries installed, and new battery racks provided. Its installation and general arrangement is pronounced by experts as first-class in every particular, with a battery power sufficient and sure for the present number of boxes, and for any additions that may be made for some time to come. The batteries are charged directly from the street railway's 500-volt trolley current, an infringement of insurance regulations and laws, but the only adequate means at hand. The State Board of Fire Underwriters gave special permission for this service for a limited time, when it will be necessary to procure the electric current from some other source. Undoubtedly, the most feasible, most satisfactory, and least expensive means will be for the town to purchase and put in a motor-generator.

At present the entire alarm system is in perfect working order, and so far as anyone can tell, reasonably sure to act when called upon.

One new box, No. 41, Myrtle St. and Mountain Road, has been added to the system the past year.

During the past year the hose wagon has been painted, new and strong runners built for the hose sleigh and the sleigh otherwise overhauled and put in first-class condition.

The general equipment of the apparatus has been kept up to the usual standard of efficiency and repair.

In accordance with the recommendation of last year, a telephone has been installed at the residence of the Chief Engineer, which, in several instances, has proved its usefulness.

Two hydrants have been added, one at the foot of Bible hill road (near intersection of East Pleasant and Mulberry Sts.), and one at corner of Myrtle St. and Mountain road.

No serious accident has occurred, the several companies are of full and excellent membership, and the Department continues in all its branches ready for prompt service.

RECOMMENDATIONS.

I recommend one or more dry hydrants in the Tremont Square district. This may be accomplished by laying a pipe from a point near Broad St. bridge to the Square, for the additional protection of the congested business district in the event of a large or general conflagration; these hydrants, or more properly stand-pipes, to be equipped with three or four-way couplings. In case of need, the steamer, taking water from the river, near the bridge, can pump into this pipe, and thus supply several powerful steamer streams in the Square, at a saving of 1,000 or more feet of hose. The elevation of the pipe would allow of its drainage back to the intake when not in use, and it would prove a further safeguard in case of frozen hydrants in or near the Square. The expense would end with the laying of the required pipe, and the eventual saving of hose and time would soon offset the initial cost.

I also recommend the purchase of three or four additional pony chemical extinguishers, to be kept at headquarters. These pony extinguishers do not cost much and are very effective, invaluable in chimney fires, and used to great advantage in stopping brush fires.

In conclusion, I wish to thank the firemen, brother officers and police officials for their hearty co-operation and assistance at all times, a factor that contributes to the most effective administration of a public department.

All of which is respectfully submitted.

C. E. SEARS, Chief Engineer.

School Board.

} School Board,

Claremont, N. H., July 2, 1906.

Stevens High School.

COMMITTEE REPORT.

The number of pupils graduated in June, 1906, was 14. Although the class entering in September was the smallest since 1902, the total enrollment is about the same as for the last two years. With the prospective increase in size of entering classes in the near future, the size of the school is likely to be further increased. The attendance during the Fall and Winter terms during recent years is shown in the following schedule:—

	'01-2	'02-3	'03-4	'04-5	'05-6	'06-7
Class D (1st year),	26	34	43	54	51	40
Class C (2nd year),	22	23	28	36	47	49
Class B (3rd year),	15	22	25	23	22	28
Class A (4th year),	17	15	18	22	14	18
Special,	—	—	—	—	6	1
	80	94	114	135	140	136

There are ten tuition pupils in attendance now, about equally divided between New Hampshire and Vermont towns. The annual tuition for non-resident pupils has been twenty-one dollars for a number of years, but as this amount is less than half the actual expense per pupil, the fee was raised to thirty dollars per annum beginning with the Fall term of '06. Other high schools in the state charge as much or more.

Mr. H. E. Thompson, the science teacher, resigned in June and Mr. Maynor Brock, a graduate of Dartmouth as well as an alumnus of Stevens High School, was elected in his place.

Owing to the increase in attendance during recent years and the demands of the various courses of study, it was found necessary to add a sixth teacher beginning with the present school year, and Miss Florence E. Leighton of

Laconia, N. H., a graduate of Brown University, was selected for the position.

The two years' commercial course recently inaugurated, while adapted to the requirements of those who can spend but two years in the school, is inadequate for those wishing a more complete preparation for commercial work, and it is hoped that it can be extended into a regular four years' course offering fuller instruction in stenography and typewriting, English, science and other specially commercial studies.

The equipment of the school has been improved by replacing the old worn-out desks with new ones in Room 2, at a cost of about $245.00. A fire escape has been installed at a cost of about $260.00. These amounts were covered by an appropriation of the town at the last annual meeting. The committee will not ask for any appropriation for equipment or repairs this year.

The school belongs to the New England College Entrance Certification Board which entitles it to send pupils by certificate to all New England colleges which admit by this method. Graduates of the school are now attending Harvard, Dartmouth, Smith, Wellesley, Massachusetts Institute of Technology, and Worcester Polytechnic Institute, and a good percentage of the present graduating class are planning to enter college.

During the past year a High School Business Association has been formed which includes as members both teachers and pupils connected with the school. In its charge are all the activities of the school whether social or financial. The working of the organization is modeled, as near as conditions will allow, on the Claremont town meeting, and its purpose is to give the student body a more intelligent view of local town government.

The record of the school in athletics has been commendable and it is gratifying to know that this favorable record has not been at the expense of scholarship. By a rule of the committee, no pupil is allowed to represent the school in any athletic contest unless he is doing satisfactory work in his studies.

Our school has been handsomely remembered in the past in the form of benefactions and bequests, yet there are still needs. We should have a gymnasium. Its value to a school and community is beyond calculation, but we realize the expense and feel that for the present it is too much to ask of the tax payers. However, if some wealthy friend of the

institution should be inclined to consider this need, it is hoped he will not delay the boon till it comes in the form of a bequest.

Many thanks are due to those who, in the past, have donated reference books and pictures to the school. Such gifts add greatly to the institution's power for good, and it is earnestly hoped that this worthy custom may not be lost sight of in the coming years.

The report of the treasurer of the committee will be found on the following pages.

For the Committee,

THOMAS W. FRY, Chairman.
J. S. WALKER, Secretary.

Claremont, N. H., March 1, 1907.

WILLIAM W. CUSHMAN, Treasurer
Stevens High School Committee.

The New Steel Bridge at West Claremont.

AT AN ADJOURNED TOWN MEETING HELD MARCH 27, 1906, THE FOLLOWING VOTES WERE PASSED.

Voted that the Selectmen be and hereby are instructed to contract for, and cause to be built a new iron or steel bridge at West Claremont, so called, near Jarvis Paper Mill to take the place of the present wooden bridge over Sugar River and that the kind of a bridge and the cost of the same be left with the Selectmen, with full power to act in regard to all matters connected with said bridge, as they, in their judgment think best.

Voted that the Selectmen be authorized and instructed in the construction of the proposed new bridge at West Claremont, to make it sufficiently strong and suitable for the passage of an electric railway and engines and cars, provided they can make arrangements in regard to the same, that in their judgment will protect the interests of the town.

Voted that the Selectmen be instructed to employ a competent engineer to advise with them in regard to the matters of said bridge, and the acceptance of the same when completed.

Voted that the Selectmen be authorized and instructed to borrow a sum of money not exceeding eight thousand dollars ($8,000 00) on the credit of the town for the purpose of paying for said bridge, the stone work and approaches to the same, and that the town pay one thousand dollars of said indebtedness annually until the whole amount is paid.

Voted that it is the sense of the voters present, that the Selectmen build a bridge strong enough to accommodate the street railway. It is understood that this resolution is not binding upon the town.

In accordance with the above votes of the town, your Board of Selectmen conferred with the officials of the Claremont Railway and Lighting Company for the purpose of ascertaining

what said company would do toward building a bridge at West Claremont capable of carrying their railway. The representatives of the company requested that two plans be made, one of a bridge for highway travel alone and one for a highway and railway bridge combined and such plans submitted for bids for the building and erection of each before they stated what the company would contribute toward a new bridge.

The selectmen next started investigation as to a suitable engineer to make designs and superintend construction of the bridge. This resulted in securing the services of Mr. John W. Storrs, of the Boston & Maine Railroad. An agreement was made with Mr. Storrs whereby he was to make the two designs asked for by the railway officials and the town in the matter of contracting for work, and inspect all work upon the bridge in the shop and in the field when the same was in process of construction and erection; the town agreeing to pay Mr. Storrs 5 per cent. of the total cost of the work for such service.

Plans were completed and notices to bidders were sent out July 12, 1906, bids to close July 24. The first advertising did not result in as many bids being received as the town had reason to expect and owing to the limited number of the same, it was decided to reject all the bids which were received and advertise for another bidding to close August 4. A larger number were received this time which are given below:

For furnishing all material and repairing and extending substructure, travel to be maintained during operation.

FROM CHAS. A. BAILEY, SUNCOOK, N. H.

For Street Railway,	$ 3,313 00
Without " "	3,479 00
Grout per bbl. of cement used,	5 78

FROM JOHN W. BURNS OF CLAREMONT, N. H.

For Street Railway,	$ 3,080 00
Without " "	3,140 00
Grout per bbl. of cement used,	2 98

Less $165 00 if travel is suspended.

FROM UNITED CONSTRUCTION CO. OF ALBANY, N. Y.

For Street Railway,	$ 2,984 00
Without " "	3,084 00
Grout per bbl. of cement used,	4 70

Less $100 00 if travel was suspended, and less a further sum of $400 00 provided they were the successful bidders for the superstructure.

For furnishing all material, constructing and erecting the superstructure, travel to be maintained during operations.

FROM EASTERN BRIDGE CO. OF WORCESTER, MASS.

For	Street Railway,	$ 10,507 00
Without	" "	9,580 00

FROM BERLIN CONSTRUCTION CO. OF BERLIN, CONN.

For	Street Railway,	$ 10,200 00
Without	" "	9,300 00

Less $450 00 if travel is suspended.

FROM GROTON BRIDGE CO. OF GROTON, N. Y.

For	Street Railway,	$ 9,500 00
Without	" "	8,274 00

FROM CANTON BRIDGE CO. OF CANTON, OHIO.

For	Street Railway,	$ 9,200 00
Without	" "	8,000 00

Less $300 00 if travel is suspended.

FROM UNITED CONSTRUCTION CO. OF ALBANY, N. Y.

For	Street Railway,	$ 9,119 00
Without	" "	7,975 00

Less $300 00 if travel is suspended.

As appears by the foregoing bids, the United Construction Company of Albany were the lowest bidders for both the substructure and the superstructure. Their combined bids including, $667 40 for grout, amounted to $12,370 40 if travel was maintained, or $11,970 40 if travel was suspended. To this would need to be added the engineer's commission.

At the request of the Selectmen, Mr. Storrs reviewed his plans to see where a reduction in cost could be made and decided that a material reduction was practicable. The railway company made an offer of $1,500 00 toward the cost of the work provided their line was accommodated. Convinced that the railway company would pay no more and considering the expression of the voters upon this point, it was decided to build a bridge of sufficient strength to accommodate the railway.

The bids which had been received on August 4th were

all rejected and an agreement entered into with the United Construction Company of Albany, which company had been the lowest bidder, by the terms of which said company were to build the bridge according to revised plans and specifications upon a unit basis of their bid, they to submit their building schedule to the engineer. It was further agreed that a contract would be made between the company and the town as soon as revised plans and specifications could be completed. Mr. Storrs worked out a reduction of $244 00 in the substructure and $721 00 in the superstructure, making a total reduction of $965 00. By closing the bridge during erection an additional saving of $400 00 was made. The contract was made on August 24th at the following price, $2,240 00 for substructure, plus the grout at $4 70 per barrel of cement, and $8,098 00 for the superstructure.

Work was commenced on the piers on October 1st, and the bridge was closed to travel on December 7th. The new bridge was opened on January 31st, 1907.

In addition to the work called for in the specifications, the approach at the southerly end was made wider at an expense of $62 21. The work contracted for has all been done with the exception of the painting. Owing to severe cold and storms an agreement was made with the contractor to have the two coats of paint called for in the contract put on in the spring and one hundred dollars has been retained by the town from the contract price until the painting can be finished.

The specifications for the substructure called for the enclosing of the old piers with a facing of concrete six inches in thickness with an extension of concrete on the down stream side of three feet, the piers being filled with grout, making them solid.

The principal specifications for the superstructure were as follows:

The bridge shall consist of a riveted Pratt Truss, span 131 feet c. to c. of end pins with an approach span of about twenty-three feet clear opening on the North end and a similar span thirteen feet clear on the south end.

The extreme length of the bridge measured on the center of the down stream truss shall be 182 feet, 7 inches, and on the center of the up stream truss shall be 181 feet, 1 inch. The North end shall be square with the center line of bridge leaving 1 foot, 6 inches skew on South end.

The truss shall be 21 feet, 6 inches c. to c., leaving a clear roadway of 20 feet, 0 inches, and carry one sidewalk 6 feet,

0 inches clear.

All parts of the superstructure except flooring shall be rolled steel of the quality known as medium open hearth, having the physical and chemical properties complying with the manufacturers' standard specifications.

Rivet steel shall have an ultimate strength of 48,000 to 58,000 pounds per square inch. A bar 3-4 inch in diameter shall bend cold 180 degrees flat in itself without sign of fracture on the outside of the bend. Field rivets shall be Burden's make, or if steel they shall comply with such tests as the engineer may direct.

The capacity of the bridge is as follows:

Live load 2,000 pounds per foot of truss; dead load 900 pounds per foot of truss; street railway 70 ton car, 25 foot truck base, 5 foot wheel base. Roadway stringers 6 tons on axles, 10 feet from center to center. The factor of safety is four (4).

Your board believe that a thoroughly good bridge of great durability has been secured at reasonable cost.

The expense of the entire work is as follows:

Contract price of both substructure and superstructure,	$ 10,338 00	
Cost of grout at $4 70 per bbl., of cement, 142 bbls. being used,	667 40	
Work and material in excess of contract,	62 21	
Engineer's commission,	550 74	
Total cost of work,		$ 11,618 35

Paid as follows:

Bernard A. Hoban, on account of engineer,	$ 75	
Rush Chellis, on acct. of engineer,	4 50	
Engineer balance of commission,	545 49	
United Construction Co., on acct.,	10,967 61	
Balance due when painting is completed,	100 00	
		$ 11,618 35

The bridge was built by the American Bridge Co. at its factory in Berlin, Conn., and erected by the contractors, the United Construction Co. of Albany, N. Y. A cut of the bridge is published herewith.

The funds necessary to meet the cost of the bridge were obtained from the following sources:

Contribution of Claremont Railway and Lighting Co.,	$ 1,500 00	
Loan authorized by vote of town,	8,000 00	
Miscellaneous revenues not required in other departments, $100 00 of which remains in treasury,	2,118 35	
		$ 11,618 35

Of the $8,000 00 hired, $1,000 00 has been paid from the tax assessment of 1906, which leaves the net indebtedness on account of bridge $7,000 00, represented by notes of the town bearing three per cent. interest, and payable $1,000 00 on January 1st of each year.
